# NDI® Checker
NDI Signal Monitoring Software

Leader

List of signal sources on the network

Receiving signal in video format

Selected signal picture (max 1 input)

Measured Information including Signal Status, Received Frames per second and Bitrate
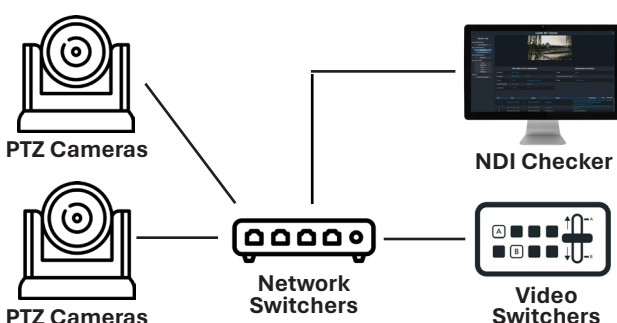

Event log of the received signal

Advanced NDI Network Monitoring and Analysis

Maintain complete visibility across your entire NDI network with our live monitoring solution optimized for broadcast and ProAV environments. Leader's NDI Checker is a new application enabling easy monitoring of NDI signals on a PC. By selecting an NDI signal source on the same network, its format, received frames and bit-rate can be monitored.

Specifications

Component	Minimum Required
OS	Windows 11 64bit (Version 23H2 or later)
Storage	80GB or more free space
CPU	Intel Core™ i5-1135G7 or more
RAM	16GB or more
Display Resolution	1920 x 1080
Browser	Google Chrome (Version 131.0.6778.265 or later)
Network Card	1Gbps or higher
Ports Used	TCP 1337, TCP 8080
Windows Features	Windows Subsystem for Linux

Workflow Example

PTZ Cameras

PTZ Cameras

Network Switchers

Video Switchers

NDI Checker

Key Features

- Display a full list of NDI signals on the network
- Select and measure the selected signal
- Simple picture display
- View the video format of the selected NDI signal
- View the number of frames received in the last second for the selected NDI signal
- Measure the bitrate of the selected NDI signal
- Event log display, with monitoring of up to 100,000 events
- CSV export for easier troubleshooting
- Windows 11 software, browser display

Pricing & Ordering Information

Duration	Price
Trial Version - 2 weeks	FOC
1 Year Software License [FS3580_NY1 NDI Checker]	$300
3 Year Software License [FS3580_NY1 NDI Checker]	$700
