IP Packet Emulation (future support)

Function	Adding jitter and checksum errors to the test signals of SMPTE ST 2110-20
Error	FCS ERROR / IP CS / UDP CS
Jitter	1 / 10 / 20 / 30 / 40 / 50 / 60 / 70 / 80 / 90 / 100 packet

- * Errors and jitter will be reflected in the output from port 1.
- * Jitter during 4K output will be up to 20 packets.
- * The duration of jitter varies depending on the output signal format.
- * There is a $\pm 10\%$ error margin in the duration of jitter.
- * RTP timestamps cause a delay twice the packet transmission interval.
